**Prices of Iron Scrap**

*157. DR. YELAMANCHILI SIVAJI : Will the Minister of STEEL be pleased to state :

(a) whether it is a fact that steel mills are suffering due to spurt in the prices of iron scrap;

(b) if so, what are the details thereof; and

(c) what steps Government have taken in the matter ?

THE MINISTER OF STATE OF THE MINISTRY OF STEEL (SHRI SONTOSH MOHAN DEV) : (a) and (b) Due to increase in customs duty on imported carbon steel melting scrap in December, 1990 and the exchange rate adjustment made in July, 1991, there was considerable increase in the price of imported scrap. Release of free foreign exchange to the Metal Scrap Trade Corporation (MSTC) was also reduced because of the adverse balance of payments situation. Direct imports by users through Replenishment licences/ Exim Scrips involved additional cost of premium. As a result of all these factors, there was substantial reduction in the import of scrap which further pushed up prices of domestic scrap. The increase in scrap prices and reduced availability of imported scrap affected production in the mini-steel plants.

(c) Government have reduced scutoms duty on imported scrap from 35% to 10% in January, 1992. This has led to some decline in the prices of not only imported scrap but also domestic scrap. In order to reduce dependence of mini-steel plants on imported scrap, Government are attaching high priority to increasing the production of sponge iron which is a substitute for steel scrap.
